

MIAMI TOWNSHIP MONTHLY

February 2024

Winter by the Numbers

The Miami Valley was blanketed with its first significant snowfall on January 19. The official amount from the National Weather Service for our area was 3 inches... just enough to kick our road crews into overdrive to clear township streets. Here is winter by the numbers:

- 10 tons of salt are loaded onboard each snowplow that covers one neighborhood
- 10-12 township crews plow and salt the roads
- 3+ inches of snow brings out the plows
- Under 3 inches means salt and brine coverage
- 10 designated snow routes in the township
- 4 hours - time it takes to put down rock salt across township
- 10+ hours for one pass through township on snowplows
- 205 lane miles of township roads to cover

Amount of gratitude to our Public Works Department - Priceless!
